Plants

Pollinators

Protected Areas

Culture & Heritage

Energy Use & Climate Change

WHAT IS LIGHT POLLUTION?

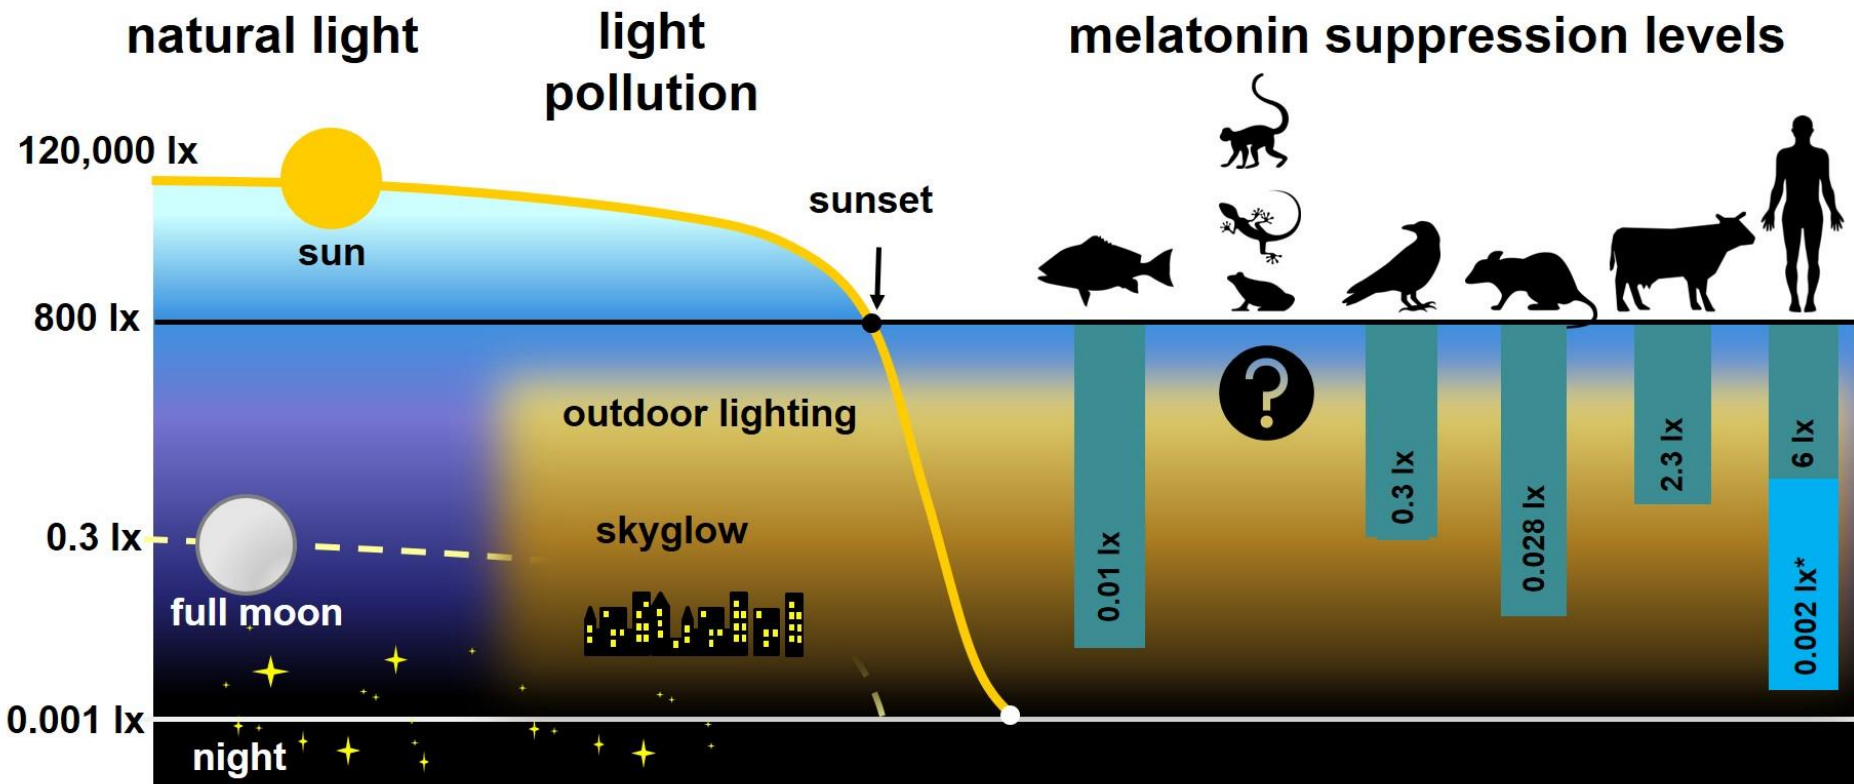

skyglow

spill light

A night photograph of a road. A bright street lamp on the left creates a significant glare, illuminating the road and the surrounding area. A penguin is walking on the road in the foreground. To the right, there is a speed limit sign showing '30'. In the background, there are some buildings and more street lights, all under a dark night sky.

glare

“How do we **maximize** the benefits of outdoor light at night while simultaneously **limiting** its costs in environmental and financial terms?”

Gaston

IDA-IES

Five Principles for Responsible Outdoor Lighting

Start with natural darkness,
add light only where it is needed.

OPPORTUNITY TO ACT, NOW

1

Recognize Artificial Light At Night as an environmental pollutant.

2

Include light pollution in the enforcement of existing European Law legislation,

3

Promote the development of best practices to mitigate light pollution,
